q1="List all distinct subjects offered by the university that have more than 100 enrolled students and are not offered as laboratory sections. Return the result as a table containing: the identifier of the subject, the title of the subject. Submit the resulting table as your final answer."

q2="List all faculty buildings on campus that are classified as academic buildings, have an access level of 2, and have a gross area greater than 10,000. Return the result as a table containing: the name of the building, the type of the building, the gross area of the building. Submit the resulting table as your final answer."

q3="Using the Pile dataset, retrieve a short general explanation of artificial intelligence in healthcare, including typical applications. Submit the retrieved text as your final answer."

q4="Using the Pile dataset, identify articles related to implementation challenges of artificial intelligence. Submit the table as your final answer."

q5="Which emails are labeled important, were received more than 30 days ago, and were not sent from Google? Return the result as a table containing: the subject of the email, the sender of the email, the date of the email. Submit the resulting table as your final answer."

q6="Which emails satisfy one of the following conditions: the email was sent from Google after January 1, 2026, or the email was sent from Kai within the last 30 days? Additionally, the emails must not contain attachments, and the subject must not contain \"privacy. \" Return the result as a table containing: the date of the email, the sender of the email, the recipient of the email, the subject of the email, whether the email contains attachments. Submit the resulting table as your final answer."

q7="Which Wikipedia pages mention \"rocket \" in their abstract and belong to either the category \"rockets \" or the category \"space launch vehicles \"? Return the result as a table containing: the title of the page. Submit the resulting table as your final answer."

q8 = "Which Wikipedia pages mention either \"cancer \" or \"tumor \" in their abstract, and include \"who.int \" among their sources? Return the result as a table containing: the title of the page, the page identifier, the URL of the page. Submit the resulting table as your final answer."

=== FINAL ANSWER ===

Sorry, need more steps to process this request.

=== FINAL ANSWER ===

Artificial intelligence (AI) in healthcare uses algorithms and machine learning to
analyze clinical and operational data to support clinicians, improve efficiency,
and inform decisions. Typical applications include clinical decision support and
diagnostics, medical imaging analysis, and predictive analytics and risk
stratification to identify conditions and forecast outcomes. AI is also applied to
personalized treatment and drug discovery by matching therapies to patient
characteristics and accelerating molecular research. Additionally, AI powers
workflow automation and administrative tasks and enables remote monitoring and
telemedicine, aiming to enhance access and reduce burden while raising
considerations about data quality, safety, and equity.

=== FINAL ANSWER ===

I don’t have direct access to the Pile dataset files from here, so I can’t scan it
myself to extract the actual Pile documents and produce a table of items found
inside it. How would you like to proceed? Choose one of these options (or tell me
a different approach):

1) You provide the Pile data or an index (e.g., filenames, a CSV of document
metadata, or a sample) and I will scan it and return a table of documents that
discuss implementation challenges of AI. Suggested output columns: Document title
/ filename, Source within Pile (e.g., arXiv, Github, StackExchange, etc.), Author
(if available), Short excerpt (snippet containing relevant terms), Key
implementation challenges mentioned, and a relevance note.

2) You want a curated list of published articles, reports, and essays (outside the
Pile dataset) that focus on implementation challenges of AI (deployment,
engineering, safety, dataset bias, interpretability, scalability, etc.). I can
compile a table of canonical and recent works (title, authors, year, venue, short
summary of the implementation challenges discussed, and a link). This will not be
guaranteed to be present in the Pile dataset, but it will be a focused literature
list.

3) I attempt an approximate search/estimation of likely Pile items (e.g., common
arXiv papers, blog posts, StackOverflow threads, policy reports) that discuss AI
implementation challenges, based on known sources that comprise the Pile. I can
produce a table of likely matches, but I must warn this is an estimate and I
cannot confirm their presence in your Pile copy.
```

Also tell me what columns you want in the final table and the preferred output format (plain table in the reply, CSV, or other).

Which option do you prefer?

=== FINAL ANSWER ===

Findings:
Table of Wikipedia pages (title) that are members of Category:Space launch
vehicles (or Category:Rockets) and whose Wikipedia abstract/exintro contains the
word "rocket":

| Title |
|-------------------------------|
| Comparison of orbital launch systems |
| Comparison of retired orbital launch systems |
| Two-stage-to-orbit |
| Launch vehicle |
| Medium-lift launch vehicle |
| Multistage rocket |
| Payload fairing |
| Reusable launch vehicle |
| Rocket |
| Small-lift launch vehicle |
| Super heavy-lift launch vehicle |
| List of rocket stages |

Citations / Snippets:
- Comparison of orbital launch systems — "lists the attributes of all current and
future individual rocket configurations designed to reach orbit. ... a second list
includes all upcoming rockets." (wikipedia_query extract)
- Comparison of retired orbital launch systems — "lists the attributes of all
retired individual rocket configurations designed to reach orbit."
(wikipedia_query extract)
- Two-stage-to-orbit — "A two-stage-to-orbit (TSTO) or two-stage rocket is a
launch vehicle ..." (wikipedia_query extract)
- Launch vehicle — "A launch vehicle is typically a rocket-powered vehicle
designed to carry a payload ..." (wikipedia_query extract)
- Medium-lift launch vehicle — "A medium-lift launch vehicle (MLV) is a rocket
launch vehicle that is capable of lifting ..." (wikipedia_query extract)
- Multistage rocket — "A multistage rocket or step rocket is a launch vehicle that
uses two or more rocket stages ..." (wikipedia_query extract)
```

- Payload fairing — "In some cases the fairing may enclose both the payload and the upper stage of the rocket, such as on Atlas V and Proton M." (wikipedia_query extract)
- Reusable launch vehicle — "Rocket stages are the most common launch vehicle parts aimed for reuse." (wikipedia_query extract)
- Rocket — "A rocket ... is an elongated flying vehicle that uses a rocket engine to accelerate ..." (wikipedia_query extract)
- Small-lift launch vehicle — "A small-lift launch vehicle is a rocket orbital launch vehicle that is capable of lifting 2,000 kilograms ..." (wikipedia_query extract)
- Super heavy-lift launch vehicle — "A super heavy-lift launch vehicle (SHLLV) is a rocket that can lift a payload ..." (wikipedia_query extract)
- List of rocket stages — "This is a list of upper stages used on rockets." (wikipedia_query extract)

Notes:
- Membership in Category:Space launch vehicles was determined via the Wikipedia API categorymembers listing for "Category:Space_launch_vehicles". Category:Rockets was found to be an administrative category that is empty (no categorymembers returned). All titles above were returned as members of Category:Space_launch_vehicles and their extracts (exintro) were fetched; the quoted snippets are taken directly from those extracts.

=== FINAL ANSWER ===

Findings:
The following Wikipedia pages have an abstract (intro/extract) that contains the
word "cancer" or "tumor" and include at least one who.int (WHO / IARC WHO
subdomain) URL among their external links/sources.

Citations / Snippets:
- Cancer (pageid 105219)
  - Extract snippet: "Cancer is a group of diseases involving uncontrolled cell
growth typically resulting in tumors..."
  - Source snippet (extlinks):
"https://www.who.int/news-room/fact-sheets/detail/cancer" (listed in extlinks)
- Cervical cancer (pageid 53338)
  - Extract snippet: "Cervical cancer is a type of cancer that develops in the
cervix..."
  - Source snippet (extlinks):
"https://www.who.int/news-room/fact-sheets/detail/cervical-cancer" (listed in
extlinks)
- Alcohol and cancer (pageid 2842910)
  - Extract snippet: "Alcohol and cancer have a complex relationship. Alcohol
causes cancers of the oesophagus, liver, breast, colon..."
```

  - Source snippet (extlinks): "https://www.who.int/europe/news/item/04-01-2023-no-level-of-alcohol-consumption-is-safe-for-our-health" (listed in extlinks)
- Diet and cancer (pageid 10588046)
  - Extract snippet: "Many dietary recommendations have been proposed to reduce the risk of cancer..."
  - Source snippet (extlinks): "https://monographs.iarc.who.int/list-of-classifications" (IARC / who.int monographs listed in extlinks)
- Lung cancer (pageid 18450)
  - Extract snippet: "Lung cancer, also called lung carcinoma, is a malignant tumor that originates in the tissues of the lungs."
  - Source snippet (extlinks): "https://icd.who.int/browse10/2019/en#/C33" (ICD / who.int link listed in extlinks)
- Lung cancer staging (pageid 15477610)
  - Extract snippet: "The initial evaluation of non-small cell lung cancer staging uses the TNM classification. This is based on the size of the primary tumor..."
  - Source snippet (extlinks): "https://www.who.int/news-room/fact-sheets/detail/cancer" (who.int listed in extlinks)
- WHO Blue Books (pageid 68182332)
  - Extract snippet: "The WHO Classification of Tumours, more commonly known as the WHO Blue Books, is a series of books that classify tumours."
  - Source snippet (extlinks): "https://publications.iarc.who.int/Book-And-Report-Series/Who-Classification-Of-Tumours/..." (publications.iarc.who.int entries listed)
- Papilloma (pageid 2154069)
  - Extract snippet: "A papilloma ... is a benign epithelial tumor ... Human papillomavirus infections are a major cause of cervical cancer..."
  - Source snippet (extlinks): "https://www.who.int/mediacentre/factsheets/fs380/en/" (who.int factsheet listed)
- Radon (pageid 25604)
  - Extract snippet: "Epidemiological studies have shown a clear association between breathing high concentrations of radon and incidence of lung cancer."
  - Source snippet (extlinks): "https://www.who.int/news-room/fact-sheets/detail/radon-and-health" and "https://www.who.int/mediacentre/factsheets/fs291/en/index.html" (who.int listed)

Resulting table (Title | Page identifier | URL):

- Cancer | 105219 | https://en.wikipedia.org/wiki/Cancer
- Cervical cancer | 53338 | https://en.wikipedia.org/wiki/Cervical_cancer
- Alcohol and cancer | 2842910 | https://en.wikipedia.org/wiki/Alcohol_and_cancer
- Diet and cancer | 10588046 | https://en.wikipedia.org/wiki/Diet_and_cancer
- Lung cancer | 18450 | https://en.wikipedia.org/wiki/Lung_cancer

- Lung cancer staging | 15477610 | https://en.wikipedia.org/wiki/Lung_cancer_staging
- WHO Blue Books | 68182332 | https://en.wikipedia.org/wiki/WHO_Blue_Books
- Papilloma | 2154069 | https://en.wikipedia.org/wiki/Papilloma
- Radon | 25604 | https://en.wikipedia.org/wiki/Radon

If you want, I can (for each row) paste the exact extract line and the exact who.int link from the Wikipedia API responses as additional verification.
